Dear City of Stevenson

I Garrett L. Ellis ask the city council for a onetime adjustment of the full amount water and sewer bill. The water bill is "the highest water bill I've ever seen" This bill is 2923.56 dollars. The water and the sewer bill are one in the same, although the water was leaking into the ground not the going down the sewer. I'm not sure how this bill was able to get a high as it did without myself, the renters, or the city of Stevenson knowing. I believe the weather had a major impact on the event. The water meter reads are so post to be on the even months. The last read at 270 Wisteria was on October, 20 2016 and then on February 20th 2017. The read in December was missed because of the weather. I was informed by Windermere Realty on the morning of February 20th 2017 that there was a big leak that needed to be dealt with. I immediately call the city and asked if it would be posable for them to shut off the water at the meter, they informed me that they already had. I happen to be in the area working and stopped by the property at noon and took photos of the area. The next day on the 21st the hole in the line was fixed by myself. Less than 24 hours later. If I had been informed that there was a problem back in December when the last meter reading was supposed to (due to weather) this would not be a issue for myself or for the city of Stevenson. I asking for a onetime adjustment for the full amount of 2923.56 dollars due to the reasons listed above. Thank you for your time to reviewing the issue. If you have any questions feel free to call.

Garrett L Ellis
