Stevenson, Washington 98648

July 28th, 2020

Hello,

County offices should all be open within the next few weeks, with some remaining by appointment only. Information regarding which office is open and how much (limited, by appointment, ...) can be found on the county's website <https://www.skamaniacounty.org/departments-offices/advanced-components/covid-19-microsite>.

The county health department tested 403 people as of yesterday, which does not include North Shore Medical Clinic. Website updates regarding cases will take place Monday-Thursday typically in the mornings. Regular meetings are taking place between the health departments and school superintendents regarding the reopening of schools. Superintendents are working with their communities on plans and options on how to open/start the school year. Decisions may not be made on which direction to take until about two weeks before school starts.

WAGAP has secured a contract with the county for the cabins, which have multiple rooms to house families that need to quarantine. They are providing housing for one family and delivering groceries and medicine to others that are in quarantine and have housing.

The PPE supplies are running low on sanitizing wipes. If you are able to use disinfecting spray and paper towels instead of the wipes, please do so. Tim Elsea is working on other sources for the wipes to replenish the stores.

Skamania and Klickitat Counties will discuss partnering in a consortium for the CDBG-CV1 funds, with Klickitat County managing the contract. The counties will need to hold public hearings and get confirmation from the cities of their intent to join the consortium prior to applying for the funds. No public hearing will be needed for the cities if they join the consortium. More information on this may be presented at the next council meeting.

The next update will be August 11th.

Thank You and Stay Safe,

Leana Kinley, EMPA, CMC

City Administrator
