

Wastewater Treatment Plant IMPROVEMENTS

5 Things to Know about Stevenson's Wastewater Treatment Plant Upgrades:

- 1.** Stevenson's wastewater treatment plant is currently operating over capacity
- 2.** This project will increase capacity for both flow and treatment of wastewater, and lift a development moratorium
- 3.** Project costs will be supported through monthly sewer rates and system development charges (SDCs) paid by new development
- 4.** The City is aggressively pursuing funding opportunities to make these improvements as affordable as possible
- 5.** Fast-track operational improvements were made to the plant in 2020 and addressed permit violation issues. Construction of full improvements to address capacity issues will begin in Winter of 2022
